

PM596: Practicum in Public Health

Guidelines for the Self-Evaluation Final Presentation

The self-evaluation shall be submitted as a PowerPoint presentation along with video (approximately 8-10 minutes in length) and should include **each** of the following five sections:

- I. **Describe the agency, goals, and objectives you outlined in your scope of work.**
 - Include the department you worked in, the project you worked on and an organizational chart.
- II. **Achievement of Project Objectives**
 - Assess the extent to which you have achieved the objectives outlined in your scope of work. Be certain to mention by what means you can determine their achievement (e.g., measures of success).
- III. **Addressing MPH Student Competencies**
 - Assess the extent to which the **two general public health** and **two track specific** competencies were addressed or enhanced through the practicum experience. For each competency identified in the inventory, list specific examples of how the experience provided an opportunity to address that competency. If these were not met, please explain. If other competencies were addressed that were not initially identified, please list and explain.
- IV. **Contribution of MPH coursework**
 - Discuss the extent to which your class-based experiences adequately prepared you for your practicum assignment. Which courses or specific knowledge areas were particularly relevant or useful during your placement? Were there other courses or content areas not covered in the MPH curriculum that would have been useful?
- V. **Overall quality of the experience**
 - How would you rate your practicum as an educational experience? Were there particular skills, knowledge or lessons you acquired unexpectedly? Did it provide you with a better sense of the skills needed for employment in the profession? What did you like best/least about the experience? Do you have any recommendations for improving the practicum experience for future students?
